

FOR IMMEDIATE RELEASE**McKinney, Texas, June 7, 2024****Introducing the iFly EFB Aviation Tablet: Revolutionizing the Skies**

Adventure Pilot is excited to announce the launch of the iFly EFB Aviation Tablet, a cutting-edge Android device tailored for the aviation industry. Merging advanced technology with the needs of pilots, this tablet is set to redefine general aviation navigation.

"The iFly EFB Aviation Tablet represents a significant advancement in aviation technology. Its robust design and comprehensive features ensure that pilots have the best tools at their fingertips," said Juanita Boyd, VP of Operations at Adventure Pilot. "We are proud to offer a device that enhances safety and efficiency in the cockpit."

This rugged device is designed for use in bright sunlight and will not shut down in high heat, making it ideal for general aviation or drone application.

Key Features:

- **Sunlight-Readable, Rugged Design:** Boasting a 7-inch sunlight-readable screen, the iFly EFB Aviation Tablet offers exceptional visibility even under bright skies. Its robust construction is designed to withstand the challenging conditions of the cockpit.
- **Pre-Loaded with iFly EFB Software:** Arriving with the renowned iFly EFB software, the tablet provides detailed charts, airport information, airspace details, and more, all accessible at your fingertips.
- **NMEA Output:** With the optional Docking Station or using a Bluetooth wireless device, the iFly EFB Aviation Tablet can send NMEA data to your auto-pilot, fuel computer, or compatible EFIS.
- **Primary or Backup Navigation System:** The tablet functions perfectly as either a primary navigation tool or a reliable backup, enhancing situational awareness and ensuring peace of mind for pilots of all levels.
- **Powerful Performance:** With 4GB of RAM and 64GB of Flash storage, the tablet ensures seamless performance. It features built-in GPS, Wi-Fi, and Bluetooth connectivity for comprehensive in-flight and ground communications.
- **Extended Battery Life:** A robust 5000mAh battery supports up to 5 hours of uninterrupted use even at full screen brightness, making it reliable for long journeys.
- **High-Quality Cameras:** Equipped with a 5MP front camera and a 16MP rear camera, the tablet allows pilots to capture and share their aerial experiences.

Additional Specifications:

- Android 12 Operating System
- Qualcomm Cortex-A53 Quad-Core Processor
- IP67 Rated for Environmental Reliability

- Operating Temperature Range: 14° F - 149° F
- MIL-STD-810G Vibration Test Compliance
- Multiple connectivity options including USB Type-C and Micro SD Slot.

Availability and Pricing: The iFly EFB Aviation Tablet is available for purchase at iFlyEFB.com or Amazon.com for \$849.
